# BHANU PRAKASH

Software Development Engineer (Full Stack developer)

+91-7761900767 | bhanuprksh05@gmail.com | Gurugram, India | 2 Years Experience | Linkedin | Github

## PROFILE SUMMARY

Full Stack Software Engineer with 2 years of experience building scalable web applications and AI-powered solutions. Proficient in React.js, Next.js, Angular, Node.js, GraphQL, and Python, with hands-on experience in authentication, analytics integration, RAG systems, caching, and database optimization.

## TECHNICAL SKILLS

**Frontend:** React.js, Next.js, Angular, JavaScript (ES6+)
**Backend:** Node.js, GraphQL, REST APIs, FastAPI, Python
**Databases:** MySQL, MongoDB, Redis, ChromaDB
**AI/ML:** LangChain, LangGraph, RAG pipelines, OpenAI/Gemini APIs
**Tools & Platforms:** Docker, n8n, Git, RabbitMQ, Amplitude Analytics, Postman, Linux, AWS, Cursor IDE

## WORK EXPERIENCE

### SDE 1 – Full Stack | Dhwani RIS, Gurugram Sep 2024 – Present

#### India Partner Network (Sattva consulting)

*NGO capacity-building platform connecting 3,000+ nonprofits with assessments, donor matchmaking, events, and curated resources.*

- Optimized frontend performance, reducing page load time by 50% and improving overall application efficiency.
- Implemented persistent login by replacing single token-based authentication with a refresh token mechanism.
- Integrated Amplitude Analytics for comprehensive tracking — custom events, user properties, and funnel analysis across registration, assessments, and events.
- Built a configurable feedback workflow with dynamic trigger timing and reminder mechanisms for post-event and post-interaction scenarios.

#### Dhwani HelpDesk

*Internal AI chatbot providing multilingual support for HR policies, coding standards, AI best practices, and project documentation.*

- Built a production-ready multilingual RAG chatbot using LangChain, ChromaDB, and OpenAI APIs for internal knowledge retrieval across PDF, DOCX, and HTML sources.
- Developed admin-controlled document management, allowing dynamic upload and indexing of knowledge base content.

#### PRAGATI

*Annual planning and target tracking system with frequency-wise indicator management and multi-level workflows.*

- Built a frequency-wise annual planning and target tracking system using Next.js and GraphQL, allowing dynamic indicator input and role-based data entry.
- Executed a multi-level approval workflow across organizational layers for transparency and traceability.

### SDE Intern | Dhwani RIS, Gurugram Mar 2024 – Aug 2024

#### Farm Mechanization

- Engineered a real-time IoT visualization portal for farming machinery, achieving a 40% reduction in report generation time through optimized queries and Redis caching.
- Designed a custom MySQL trigger-based reporting table to aggregate farmer data across services, reducing dashboard query load by 60%.

## EDUCATION

**B.Tech – CSE** | CGPA: 8.14 / 10 — Chandigarh University, Mohali | 2020 – 2024

**12th - CBSE** | 90.8% — Shanti Mission Academy, Saharsa | 2020
